

Overview

GVD HD NVR Certification Training is a technical training class developed to provide the students with the knowledge and hands on experience needed to sell and install a GVD NVR appliance.

The class consists of a one day Instructor led GVD product overview and a ½ day student hands-on lab exercise where the students will install a GVD HD NVR and attach a variety of IP cameras we offer at ABP.

NOTE: Please remember to bring your laptop to the training.

Agenda

Day 1 – GVD Product Overview led by Instructor

9:00 AM – 12:00 PM

- System Overview
- Create Storage Volume
- Create Storage Volume
- Add IP Cameras Manually
- Add IP Cameras by Auto Discovery Utility
