Get to know the easiest solution for the monitoring of your IT rooms!

abp TECH

As important as the firewall!

Our MultiSensor® technology secures your IT against over-temperature, burglary, fire and up to **35 other threats** with only one device - that is what makes Kentix so ingeniously simple.

50% of IT outages have physical causes!

In contrast to outages that are caused by software errors, the downtime after a physical defect has occurred is usually longer and more expensive. Common threats are:

- Over temperature
- Power outage or UPS errors
- Fire or smoldering fire
- Water leakage
- Burglary and theft
- Human errors

We offer you the ideal solution for the physical security of your IT infrastructure. Kentix systems replace multiple individual solutions and save about two-thirds of the otherwise usual cost. The advantage lies in the Kentix MultiSensor® technology, an all-in-one solution that detects all major threats with **only one sensor** and sends out alerts instantly before they lead to expensive blackouts.

Kentix devices are completely IT based and are easily integrated even in distributed IT infrastructure.

Close the gap in your IT security and meet BSI safety requirements or the ISO27000 with Kentix solutions.

Applications:
- Server rooms, data centers and IT cabinets
- Offices and administrative rooms
- Industry, production sites and storage areas
- Container sites and distributed IT infrastructure

The physical monitoring of your IT is just as important as the mandatory firewall and is thus an important component in your IT security.

Fulfills IT COMPLIANCE

The ingenious Kentix MultiSensor® technology
Detects all major threats in the server room reliably - with only one device!

THERMO	HUMIDITY	DEWPOINT
FIRE	MOTION	VIBRATION
VOLTAGE	EXT-IN-OUT	LEAKAGE
BUZZER	SABOTAGE	MONITORING

360° monitoring with the StarterSet-PRO
Secures your IT rooms according to baseline protection. Can be upgraded to 100 MultiSensors and distributed rooms at any time!

Integrates alarm system and early fire detection!

Detects up to 37 threats!

Monitors 50 servers!

- 100 MultiSensors connectable
- 50 servers live monitoring
- Web-GUI - APP - PC client
- SMS - E-Mail - SNMP
- 100 alarm recipients
- IP cameras accessable

Includes everything you need for a server room of approximately 20 sqm:
- 1x AlarmManager-PRO
- 1x MultiSensor-RF
- 1x MultiSensor-DOOR
- 1x power supply, cable and mounting material

Your IT under control from anywhere - via browser or app
